Junior Industrial Designer

Job Reference No: **JrID0626**

Award Winning

We have gained numerous awards over the years including Medical Design Excellence Award, reddot award, and UX Design award.

Medical Design

We focus exclusively on medical design that has a positive impact on people's lives.

Our Office

We're in the top three floors of a converted grain store in Leith, Edinburgh. Leith is an eclectic waterfront area with a mixture of creative businesses, bars and restaurants. It was recently named one of the world's 'coolest neighbourhoods'.

Personal Development

Everyone is encouraged to hone existing skills and develop new ones as part of our training and development plan.

Socialising

We like to unwind with our colleagues at the end of each week and on special event days throughout the year.

Diverse Projects

Project diversity keeps life interesting and allows us to develop as a company and on a personal level.

Junior Industrial Designer - Vacancy Details

About Shore

Shore is an employee-owned medical design and development consultancy, with an excellent reputation in the market for delivering solutions across a wide range of projects, working collaboratively with multiple long-term clients.

We offer exciting career opportunities to see your ideas come to life in exceptional products that have a positive impact on people's lives, working from early-stage design through to manufacturing and supply.

Our collaborative culture is one of the key elements of our success, and we encourage knowledge sharing and communication across the company. Our office is a converted grain store in Leith, the thriving waterfront area of Edinburgh which has a mixture of creative businesses, bars, and restaurants.

About the Role

We have an immediate full-time position for a junior Industrial Designer to join our dynamic & successful team in Edinburgh and contribute to the development of a diverse range of medical products that transform lives.

In this role, you will directly contribute to a diverse range of device developments, including drug delivery, diagnostic, therapeutic, and surgical devices. You will provide design expertise across multiple projects providing a keen aesthetic sensibility and creative problem-solving, supported by solid technical knowledge, within a human-centred, inclusive approach to design. Your customer-facing responsibilities will include ensuring projects are completed on schedule and within budget while building lasting partnerships with both existing and new customers.

Based in our Leith office, this role offers a competitive salary, substantial benefits and the opportunity to build your professional experience as part of a tight-knit and experienced team. The shared values & collaborative nature of our team will provide many opportunities to quickly expand both your professional & personal growth within a supportive working environment.

About You

You will have recently qualified to degree level in a relevant design discipline and may have up to 2 years post-graduation experience. Your expertise should include elegant form development enabled with hands-on design skills as well as an appreciation of human-centred design, mass-production techniques, engineering principles and a comprehensive understanding of the product development cycle. Experience and interest in User Interface development, wireframing and prototyping is also advantageous.

You will be equally comfortable working alone with minimum supervision or as part of a wider project team. At all times bringing your own, enthusiasm, optimistic outlook, and powerful creative input, always pushing the boundaries with fresh ideas and technical solutions.

Ideal Requirements / Skills

- Strong form development with elegant aesthetics, proportion & attention to detail
- Creativity in the generation of ideas via hand sketch work & model making
- Understanding of human factors, ergonomics and human-centred design
- Competent use of Adobe Creative Suite Packages
- Working knowledge of 3D CAD and rendering software
- Excellent communication and presentation skills
- Ability to work in a team or as an individual with little guidance
- Professional awareness and appreciation of customer focus
- Experience and interest in UI/UX design

Knowledge of medical device development is not essential, and we don't expect you to have all the skills listed, so please do apply if you think you can deliver a positive impact. Everyone at Shore is encouraged to hone existing skills and develop new ones as part of our training and development plan.

Benefits

You will receive a competitive salary, great benefits package including significant company performance profit share scheme. We also acknowledge the importance of maintaining a strong work life balance which is reflected in the office environment. Full current benefits list as follows:

- Annual Employee Ownership Bonus
- 30 days annual holiday (increasing to 35 with service)
- Company pension contribution
- Permanent health insurance
- Subsided lunches at local deli's
- Regular social events
- Casual dress
- On-site parking
- Sick pay
- Cycle to work scheme

How to Apply

If you are interested in applying to join our team, please send cover letter, your full CV and portfolio examples of your work to,

jobs@shore-group.com quoting reference **JrID0626**

Please note, due to the high number of enquiries we are unfortunately only able to respond to shortlisted candidates.
